## A | AGRICULTURAL MECHANIZATION COURSES

The following is a list of some of the courses taken by students in agricultural mechanization. Also listed are the instructor or instructors who first taught the course, followed by other instructors in parenthesis, the date the course was first offered, and the dates the course was changed.

It may help to know that in the early days all courses carried one departmental designation—Agron, FM, or AE. In 1958 the designations were changed so that the agricultural mechanization courses were given the designation “AG M,” later to become “TSM,” while the engineering courses retained the designation “AE.” The numbers used have a hierarchy which is 100-level courses are for freshmen and sophomores, 200-level for sophomores and juniors, 300-level for seniors and graduate students, and 400-level for graduate students. Within the hierarchy, courses in the 30 series are field machinery, 40 series designate farm power, 50 series are soil and water, 60 series deal with housing, 70 series is farm structures, 80 series covers electric power and processing, and the 90 series is reserved for individual study.
